

# ATM Terminal Driving Service Deposit Automation

## Reduce Deposit Risk and Increase Consumer Confidence

Visa® Debit Processing Service ATM Terminal Driving Service Deposit Automation capability increases convenience for your ATM users and simplifies deposit processing for you. Now your customers can deposit checks and cash without an envelope and enjoy the peace of mind of check images and deposit details on their receipt. Deposit Automation also enables you to validate bills as they are deposited and electronically transmit check images from the ATM to your financial institution for clearing. Whether your customer has one check, a stack of checks or a combination of cash and checks, Deposit Automation makes depositing easy and envelope-free.

## Greater convenience and efficiency

### Avoid empty envelopes

Reduce the risk and incidence of errors.

### Verify in real-time

With the ability to validate currency at the time of deposit and make authorization decisions based on MICR info, you can reduce problems and increase satisfaction.

### Increase funds available

Real-time validation allows faster access to funds.

### Improve customer comfort

Check images and deposit details on the receipt help customers feel more comfortable with ATM deposits.

### Eliminate daily ATM visits

Electronically transmit check images from the ATM to a Visa DPS-hosted consolidation server and then on to your back office for clearing without needing to physically retrieve checks.

# Understanding the Device Details

Visa DPS ATM Terminal Driving Service Deposit Automation offers specific functionality for each device manufacturer.

Manufacturer	Devices

Don't see your hardware listed above? Contact Visa DPS for the latest information on supported device types.

Enhanced transaction support allows for unique funds availability parameters, authorization options, reporting and settlement capabilities, and file creation. Supported transactions include:

- Check only deposits/payments
- Cash only deposits/payments
- Mixed check and cash deposits
- Check deposit with cash back (Diebold only)

Visa DPS ATM Terminal Driving Service Deposit Automation supports:

- Depository Sweep Total and Settlement capability (patent pending)
- Daily Deposit Verification file
- Transaction Inquiry Information including check and denomination details
- Robust reporting
- Custom Authorization Parameters
- Detailed or summary-level customer receipts with image printing options
- Optional Image transport

*With Visa DPS ATM Terminal Driving Service Deposit Automation, Visa manages the transaction authorization while the agent at the ATM manages the image transfer. The data and image are sent to a consolidation server using secure file transfer. Each check and cash item is translated into the appropriate file format for transfer to the financial institution for validation.*
