

Risk Management & Fraud Detection – Falcon Managed Real-Time Decisioning

Comprehensive Solutions. Proven Performance.

Reduce your portfolio's fraud losses with Visa® Debit Processing Service Falcon Managed Real-Time Decisioning. Our full-service call center clients can further protect their card programs with Falcon Managed Real-Time Decisioning, a series of real-time decline rules developed by Visa DPS fraud experts based on actual performance and customizable for your business. Rather than simply targeting rules to current fraud patterns and trends, our real-time decisioning solution uses multi-faceted risk intelligence data and actual false positive rate performance to determine the most effective real-time decline strategies to help you reduce fraud.

Increase protection by focusing on performance

Reduce fraud losses

Our proven real-time decline rules are developed based on actual performance to improve fraud prevention.

Improve fraud prevention

Ongoing evaluation of rule performance enables superior fraud prevention effectiveness.

Reduce operational costs

By lowering fraud claim counts, real-time declines can help minimize risk management expenses. The more effective your decline strategies, the more cost-efficient your operations.

Simplify management

Visa DPS fraud experts maintain Falcon Managed Real-Time Decisioning rules on your behalf so your staff can focus their efforts on other aspects of your business.

Customize your solution

We work with you early in the process to determine how aggressive you want to be in combating fraud and then customize the solution to meet your level of risk tolerance.

Minimize cardholder inconvenience

Our flexible solution allows you to select the performance level that meets your risk tolerance needs, minimizing cardholder impact while maximizing fraud reduction benefits.

Contact us today to learn how Falcon Managed Real-Time Decisioning is blocking fraud as it occurs—while maintaining a low false positive ratio—for our existing clients.
