

Network Gateway Processing

Streamline your processing strategy with a single solution for all networks.

Consolidate processing for all of your networks through Visa DPS and enjoy the strategic integration, operational simplicity and cost-effectiveness of our single-point Network Gateway Processing service. You'll have one connection for all your transactions, an experienced processor handling all the technical aspects of network connectivity, and a consolidated end-of-day settlement. You'll also benefit from consistent tools to manage all of your diverse transactions in an increasingly complex payments landscape, including the protection of advanced risk management tools, the critical insight of cross-portfolio business analytics, and the resources you need to ensure a consistent experience for your cardholders.

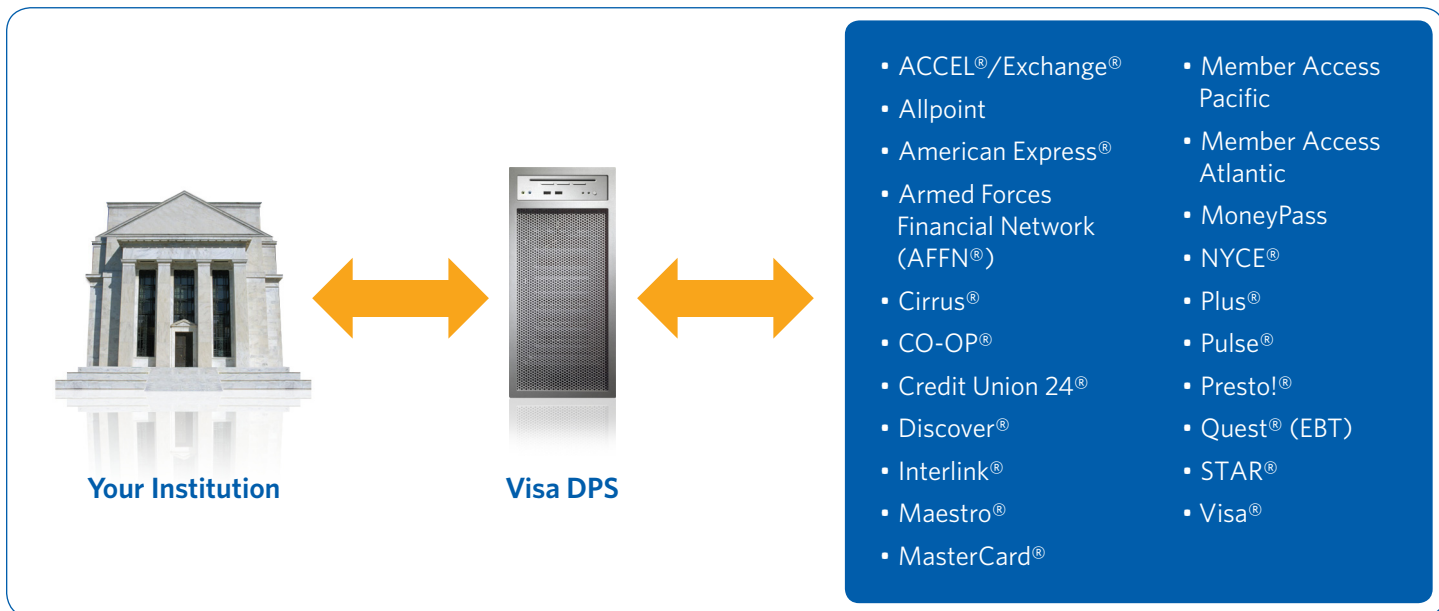

One Connection. Many Benefits.

- **Reduce costs.**
Consolidating transaction processing through a single processor can eliminate redundant functionality and streamline back-office procedures while shifting the cost of network connectivity and compliance from your institution to Visa DPS.
- **Optimize authorization.**
Applying the powerful Visa DPS authorization platform to both your Visa and non-Visa transactions can help improve authorization rates, reduce fraud and increase cardholder satisfaction.
- **Minimize overhead.**
Free your staff from having to manage multiple systems and avoid the costly needs to keep up with network updates, changes and other mandates.
- **Improve oversight.**
With Visa DPS you have a wealth of tools such as Visa Resolve Online for Visa DPS, Visa Data Manager, and a suite of Visa risk management solutions that can be applied to both Visa and non-Visa network transactions for comprehensive risk management and insight into your diverse card portfolio.
- **Streamline operations.**
Take advantage of easy-to-use tools and a single end-of-day settlement to maximize consistency in your transaction processing and simplify reporting.
- **Increase consistency and reduce training.**
Give your staff the convenience of entering and monitoring exception items using the same tools they use for Visa-branded exception items or simplify operations further by outsourcing these efforts to Visa DPS Exception Processing Service.

Simplify for Operational Advantage.

With a single connection to Visa DPS, your institution has access to all major networks:

Single-point settlement:

Visa DPS's daily settlement with all external networks eliminates the need to track individual positions or varying cutoff times for each network.*

Single-point exception processing:

Our single-point exception item processing for all chargebacks and adjustments simplifies your operations and minimizes staff training.

Comprehensive back-office tools:

Our easy-to-use, online tools give you complete insight into your operations with all networks and consolidated reporting capabilities for improved operational management.

Consistent customer support:

Processing all of your networks through Visa DPS allows you to offer consistent support for your cardholders — from the information we provide to your host system and services provided by our call center to the implementation of emerging products such as Visa DPS mobile services.

Learn more about Visa DPS Network Gateway Processing
